

## Godiva Service Bulletin - E10 Fuel - Update on our Portable Pumps

---

A change from the standard petrol grade fuel (95 octane) in Great Britain will become E10 in summer 2021 and in Northern Ireland in 2022. Below is a list of Godiva portable pumps which are compatible with the E10 fuel, please note those that are not compatible E5 (97+ octane) is a substitute.

Pump Type	E10 compliant	Fuel
GP8/5	<input checked="" type="checkbox"/>	E10 Compliant
GP12/10 & GP17/10	<input checked="" type="checkbox"/>	Up to E15 Compliant
GP275	<input checked="" type="checkbox"/>	E10 Compliant
GP10/10	<input checked="" type="checkbox"/>	E5 only
HPX75-B18	<input checked="" type="checkbox"/>	E10 Compliant
HPX75-B23	<input checked="" type="checkbox"/>	E10 Compliant

Additional notes:

Briggs and Stratton engines are certified up to E10.

E10 petrol contains up to 10% renewable ethanol, which will help to reduce carbon dioxide (CO<sub>2</sub>) emissions associated with petrol vehicles and tackle climate change. Petrol in the UK currently contains up to 5% renewable ethanol (known as E5).

E10 petrol is already widely used around the world, including across Europe, the US and Australia. It has also been the reference fuel against which new cars are tested for emissions and performance since 2016.

Using E10 petrol can slightly reduce fuel economy.

For any additional queries please see <https://www.gov.uk/guidance/e10-petrol-explained> or feel free to contact Godiva customer services.
