

Trailer Mounted Pumps

Hale's Trailer Mounted Pumps provide a fully mobile and self-sustaining fire suppression package. Utilizing a heavy duty trailer with fuel tank for extended operations and a fully integrated diesel engine and plumbing system for 750 up to 5,000 GPM of water delivery capability.

Features

- Emissions compliant diesel engine with up to 500HP performance
- Easily monitored and controlled engine systems
- Generates NFPA 1901 rated flows from 750 GPM (2,839 L/min) to 5,000 GPM (18,927 L/min)
- Hard, fine grain bronze, mixed flow impeller design is hand ground and balanced for maximum performance
- For minimal maintenance the spring-loaded mechanical seal is self-adjusting and self-lubricating
- Heavy duty precision ground, deep groove bearings used for long-life
- Heat treated one piece stainless steel pump shaft has been designed for strength and minimize pump deflection
- Bronze clearance ring is easily replaceable
- All stainless steel manifolding for corrosion resistance
- Ergonomically positioned and easily actuated intake and discharge valves
- Heavy duty single or tandem axle trailer with fuel tank for extended operation
