

KP Pump

The Godiva KP series of rear or midship mounted PTO driven centrifugal fire pumps offers the ultimate in unrivalled performance up to 1500 LPM because only the KP offers both a single-pressure and a multi-pressure option, reduced whole life cost of ownership, is easily installed and maintained all in the smallest, lightest package in the market.

Features

- EN1028 rated performance to 1500 l/min at 10 bar and 250 l/min at 40 bar
- NFPA rated to 500 gpm
- Small size allows room for additional equipment
- 5 year maintenance intervals reduces downtime and maintenance costs
- Single piston primer has simple construction for low cost of ownership, with fewer parts
- Fail safe electric primer shutoff Ensures primer is not activated at higher speeds, greatly increasing the life of the primer
- Primer seal assembly removed by two bolts so assembly can be maintained at a work bench
- Identical plumbing can be used on engine and opposite engine rotation pumps
- Three gearbox orientations - Left, right, and down orientations for installation flexibility
- Three volute orientations - Left, right, and vertical orientations for plumbing flexibility (Single pressure only)
- 1.90:1, 2.33:1, 2.91:1 ratios to suit most engine and PTO applications
- Available in light alloy or gunmetal
