

UV SmartFOAM

Combining the superior attributes of SmartFOAM with UltraView offers the most intuitive combination of flexibility and ease-of-use currently available on the market. SmartFOAM allows up to 6 unique presets so that the operator is only one button press away from setting up the apparatus for any fire ground scenario.

The SmartFOAM controller is available for all foam proportioner models (1.7A, 2.1A, 3.3, 5.0 and 6.5) and will be the standard user interface for 3.3, 5.0 and 6.5 models.

Features

- Plain-text warnings and instructions (multi-language capable)
- On-screen calibration and user tutorials
- Service and maintenance reminders
- Logging of critical operational data
- Ability to operate multiple foam proportioners from a single controller for maximum flexibility in performance
